Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Skaler '279 (note especially Figures 1-4; column 1, lines 55-65; and column 2, lines 1-49).

Claims 1, 2, 4-7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lonardo '889. As concerns claims 1, 2, 4 and 5, Lonardo '889 shows the claimed limitations of a method for rotating a patient (56) to one side in a bed, comprising: passing an elongated strap (26) around the patient wherein the strap comprises a lower end having an attachment device (36, 37), an upper end (28) having a handle (the free end thereof), and padding (12, 14); attaching the lower end (30) to a bed rail (54) (as described in column 3, lines 24-28); grasping the upper end (as shown in Figure 6); and pulling the upper end toward the bed rail whereby the patient rolls towards the bed rail (as shown in Figure 7 and as described in column 3, lines 21-24). With regards to claims 6, 7 and 9, the reference also discloses the steps of passing a second elongated strap (24) around the patient wherein the second elongated strap comprises a second lower end (34) having a second attachment device (36, 37) and a second upper end (32) having a handle (the free end thereof); attaching the second lower end to a bed rail (54) (as described in column

3, lines 24-28); and grasping the second upper end (as shown in Figure 6), prior to said pulling.

As concerns claim 10, the reference is considered to show a condition wherein the elongated strap is at a nipple line and the second elongated strap is at a buttocks of the patient in Figure 5.

Claims 11-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by GB Patent No. 2,213,734 to Hatcher et al. (note especially Figures 1 & 2; page 1, lines 12-26; and page 2, lines 1-17).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lonardo '889 in view of Mann '879. Lonardo '889 does not specifically disclose conditions wherein the (first) attachment device is a snap and wherein the second attachment device is a loop and hook device. Mann '879 provides the basic teaching of a body positioner (10) comprising a plurality of straps (12-15), wherein each strap includes snap (21, 23) as well as hook and loop devices (20, 24). The skilled artisan would have found it obvious to replace the attachment devices of Lonardo '889 with snap and loop and hook devices in order to provide a simple alternative means for attaching the straps to a bed rail as desired.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hatcher et al. '734 in view of Gershman. Hatcher et al. '734 do not specifically disclose a condition wherein the attachment device (5) is a hook and loop device. Gershman teaches the use of hook and loop fasteners which may be used to replace slide buckles and safety buckles. The skilled artisan would have found it obvious at the time the invention was made to replace the attachment device of Hatcher et al. '734 with a hook and loop device since such a modification would have been generally considered as a substitution of art-recognized equivalents as taught by Gershman.

Conclusion

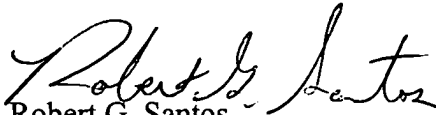

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newman et al. '044, Vanarnem '834, Lonardo '231, Lonardo '226, Littleton '925, Parker '903 and Witter '225.
